

Technology Vocabulary

algorithm	debug	host
analog	delete	html
app	desktop	hyperlink
application	digital	hypertext
array	digital native	icon
backup	disk	inbox
bandwidth	DNS (domain name system)	integer
binary	document	interface
bit	domain name	Internet
byte	dot matrix	IP address
bitmap	download	ISP
blog	drag	iteration
blogger	DVD (digital versatile disc)	Java (Javascript)
bluetooth	dynamic	joystick
bookmark	email	JPG
boot	emoticon	junk mail
broadband	encrypt	key
browser	encryption	keyboard
buffer	enter	keyword
cache	Ethernet	kilobyte
caps lock	FAQ (frequently asked questions)	laptop
CD-ROM	file	laser printer
client	finder	log out
clip art	firewall	logic
clip board	firmware	login
cloud computing	flash drive	lurking
command	floppy disk	MAC
compress	flowchart	macro
computer	folder	mainframe
computer literate	font	malware
computer program	format	media
configure	frame	memory
cookie	freeware	mirror
copy	gigabyte	modem
CPU (central processing unit)	GPS	monitor
cursor	graphics	motherboard
cybercrime	GUI	mouse
cyberspace	hack	multimedia
dashboard	hacker	net
data	hard drive	network
data mining	hardware	node
database	home page	notebook computer

Technology Vocabulary

offline	root	thread
online	router	toolbar
open source	runtime	trash
operating system	save	Trojan horse
option	scan	typeface
output	scanner	undo
page	screen	Unix
password	screenshot	upload
paste	script	URL
path	scroll	USB
PC	search engine	user interface
peer-to-peer	security	username
phishing	server	utility
piracy	shareware	version
pirate	shell	virtual
pixel	shift key	virtual memory
platform	snapshot	Virus
plug-in	social networking	web
podcast	Software	web host
pop-up	spam	webinar
portal	spammer	webmaster
print	spreadsheet	website
printer	spyware	widget
privacy	status bar	WIFI
process	storage	wiki
program	supercomputer	window
programmer	surf	wireless
protocol	syntax	word processor
queue	table	workstation
QWERTY	tag	worm
RAM (random access memory)	technophile	WWW--World Wide Web
real-time	Technophobe	XML
reboot	template	zip
resolution	terabyte	
ROM (read only memory)	terminal	

During the next two weeks, please define the technology terms which are not known to you. During class on September 15, 17, 22 and 24 you may ask for assistance with the technology definitions (one word at a time).

On September 29 and/or October 1, there will be a quiz (or quizzes) over 50 or more of these terms. Based on the skill set for mastery for this course, students will: *Define basic computer terminology.*

Mastery on the Vocabulary Quiz will be a quiz score of 90% or above. Students may retake the Mastery Vocabulary Quiz (not the same version of the quiz) until they reach the 90% or above score.
